

Report attributes in Header shows standard details including logos, report title, security markings, Report Parameter: Month and Year selected and last time data was updated: NB Generally data is rolled up and summarised overnight, therefore some transactions will only be displayed the day after they're updated e.g. weight changes will appear immediately but interactions will not.

Last 12 Months Planned vs Ordered vs Treatment Product Usage (volume) shows amount of product by volume planned for the patient, how much was ordered for them and how much has been used in ABDR and MyABDR Treatments.

Patient Details shows the patient's address and demographic details, including patient type at your HTC and the MyABDR icon if patient is associated to a MyABDR account.

Clinical details displays latest Inhibitor Status information and diagnosis, showing multiple diagnoses where

Interaction History for each interaction that occurs in the Month and Year, a blue line appears, multiple lines are displayed and the Total number of interactions for the period shown is totaled.

Interactions Between DD MM YYYY and DD MM YYYY graphs all interaction activity for the patient and displays summary information for each interaction. NOTE this is a Header with the details shown over the page when the report is generated, but are not shown in this Quick Reference Guide. Details are:
Interaction Counts by Type and Month graphs the number of interactions recorded in the last 12 months; and
Interaction Detail lists Interaction Date, Type and Summary for interactions shown in the graph.

Last 10 changes to patient measurements graphs the change in weight and weight for the last 10 changes. The date of each change is displayed on the horizontal axis.

If there has been rapid change in a short period of time the earlier changes will drop off even if they occur in a time period that you expect to see graphed.

Calendar and Age the time band shown is the previous two years from the month and year selected in the report parameters plus six months into the future from current date.

Product Usage shows Planned, Ordered and Treatment usage by month in the Calendar period.

Report attributes in footer shows standard details including security markings, date report was printed, by whom, and number of pages.

Key Changes displays a single yellow diamond in the month that a change or changes to the patient's clinical status occurs.
